

Stainless Steel Podium

Elegant Look, Brushed Stainless Steel Construction

The new Stainless Podium has fashionable stainless steel accents with rounded edges decorating all three customer facing sides. This gives the podium a sharp look rather than a sharp touch. It also has an inviting customer counter that not only looks good but helps hide the working surface.

The structure, exterior, and even the hardware are all stainless steel. So this podium is great for accounts with extreme weather conditions that have to deal with heat, humidity, and/ or coastal air.
